DETAILED ACTION

Election/Restrictions

1. It is noted that Claims 1-12 and 54-74 were previously canceled by the transmittal letter of the national phase filing under 35 U.S.C. §371 on 18 January 2002. The restriction requirement to those claims is considered moot. Claims 13-53 are pending.
2. Applicant's election without traverse of Group IV in the reply filed on 30 July 2004 is acknowledged.
3. Claims 13-17 and 29-53 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 30 July 2004.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 18-20, 22, 25 and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,425,723 to Wang.

Wang discloses a catheter having an elongated support 40, porous membrane 32, nonporous membrane 14 and a guidewire lumen 42. See Figures 1-5.

5. Claims 18-27 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6,206,849 to Martin et al. (hereinafter "Martin").

Martin shows a catheter having an elongated support 48, a porous membrane 46, ribs 56/60, a nonporous membrane (unnumbered), first lumen 50, second lumen 52 and a guidewire lumen 54. See Figures 1-6.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 28 is rejected under 35 U.S.C. 103(a) as being unpatentable over either Wang or Martin.

Either Wang or Martin discloses the claimed invention as shown above. Neither Wang nor Martin discloses expressly the membrane having an average pore diameter of less than .23 microns. At the time the invention was made, it would have been an obvious matter of design choice to a person of ordinary skill in the art to use pores having a diameter of less than 0.23 microns because Applicant has not disclosed that such a pore diameter provides an advantage, is used for a particular purpose, or solves a stated problem. One of ordinary skill in the art,

furthermore, would have expected Applicant's invention to perform equally well with the pores of Wang or Martin because both provide means of delivering fluid. Therefore, it would have been an obvious matter of design choice to modify either Wang or Martin to obtain the invention as specified in claim 28.
